

ABSTRACT

5

A process for preparing transparent Pigment Yellow 138 by grinding Pigment Yellow 138 in the presence of a grinding agent, preparing an aqueous slurry of the ground particles, and filtering the slurry resulting in a filter cake containing particles of transparent Pigment Yellow 138. In addition, a process for improving color strength of
10 an ink and/or plastic composition is also disclosed by adding transparent Pigment Yellow 138 to the composition.
